

## Measuring the height

The necessary height measurement is HP  
(passage height)

Measure from the underside of the plastered surface  
at the top—down to the finished floor.

## Measuring the width

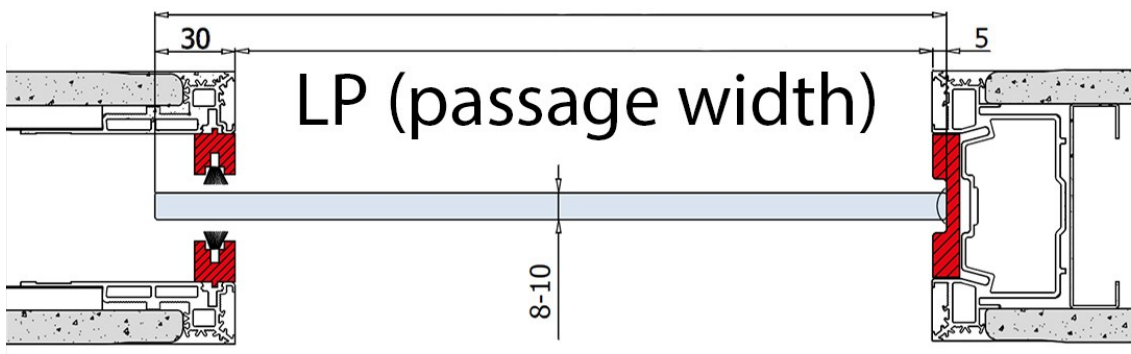

### Single and Double doors

The necessary width measurement is LP  
(passage width)

Measure from the inner plastered surface on the  
left—to the inner plastered surface on the right.

Glass Height (HM) is  $HP - 28\text{mm}$

## LM (glass width)

$$LM = LP + 35\text{mm}$$
